

## PRAB Quench Conveyors

PRAB offers a complete line of Quench conveyors used to cool metal scrap or parts. The package includes a liquid-tight tank along with dependable PRAB conveyor. The use of Quench conveyors helps to improve casting consistency and productivity. Quench Conveyors are an excellent choice where air cooling is not sufficient or practical. Chillers are available to conserve water usage.

### Quench Conveyor Features:

- Liquid-tight tank options:
  - Separate tank unit
  - Integral part of conveyor
